Full Stack Developer with 4.5+ years of experience across Banking, NBFC, and Ad-Tech. Built scalable frontend systems and secure REST APIs for high-traffic platforms serving 25M+ monthly active users, with expertise in React 18, state management, performance optimization, and scalable architecture.

WORK EXPERIENCE

IBM

Mumbai

Applied AI Specialist

Oct 2024 – Present

- Shipped Mahindra Finance's Super App Platform, which puts all of Mahindra Finance's loans, fixed deposits, and financial services into one single web application, serving to **10M+ active users**.
- Re-architected internet banking web application to standardize reusable UI components with MUI and SASS, **reducing duplicate UI logic by 30%** and improving cross-module consistency.
- Developed Internet Banking credit card features, Login and Registration module, including bill payments and billing cycle management, enabling users to manage card-related services online securely
- Contributed to the backend development of Login Registration modules, implementing OTP verification using IBM Verify services along with session management, token handling, password recovery, and account block/unblock workflows.

Media.net Software Services

Mumbai

UI Developer

Oct 2021 – Oct 2024

- Developed reusable frontend components for a major US-based content platform serving 25M+ monthly users using React, Vue.js, TypeScript, and Tailwind CSS, including accordions, modals, forms, and content blocks.
- Improved Core Web Vitals performance to 99% by optimizing rendering, reducing Cumulative Layout Shift (CLS), deferring non-critical assets, and implementing caching strategies.
- Developed a custom WordPress admin plugin for managing server-hosted JSON configurations with Role-Based Access Control (RBAC), eliminating 100% of manual developer intervention for content updates.

PROJECTS

Eklavya: A questionnaire generation system

- Contributed to backend development of a real-time quiz platform, enabling automated assessment generation from OCR-processed images using Node.js and GraphQL.
- Implemented GraphQL-based real-time data synchronization for quiz sessions, enabling low-latency updates between clients and backend services.
- Integrated TensorFlow-based proctoring to analyze head-pose deviations and flag potential exam integrity violations.
- Developed modular backend and frontend components with scalable state management to support maintainable and extensible quiz workflows.

TECHNICAL SKILLS

Languages & Frameworks: HTML, CSS, Javascript, TypeScript, GraphQL, Next.js, Node.js, React, Tailwind CSS.

Cloud & Databases: AWS, MongoDB, Redis, Docker.

Tools: Github Actions, Jenkins, Grafana, Cypress, vitest, Lighthouse report, Web Accessibility.

EDUCATION

Bachelor of Engineering in Computer Science

2018 – 2021

Vivekanand Education Society's Institute of Technology

Mumbai, Maharashtra
